STRENGTH OF MATERIALS
Volume 3, Numbers 1-12, 1971
(A translation of Problemy Prochnosti)

Volume 3, Number 1 January, 1971

	Engl./Russ.	
SCIENTIFIC-TECHNICAL SECTION		
Deformation and Failure of Materials under Conditions of Variable Temperature and Stress – G. S. Pisarenko, E. A. Antipov, and N. S. Mozharovskii	1	3
Estimate of the Thermal Endurance of Heat Resistant Alloys under Actual Operating Conditions – N. M. Sklyarov, N. I. Kononchuk, S. L. Zhukov, N. D. Zhukov, B. N. Vasil'ev, L. M. Akimov, Yu. A. Lapitskii, M. S. Belyaev, G. S. Krivonogov, I. I. Ishchenko, A. D. Pogrebnyak, and V. N. Kufaev	10	13
Thermal Fatigue of Perlite Steels under Different Oxidizing Conditions – V. I. Egorov and V. A. Plekhanov	19	22
Influence of Cyclic Overloads on the Strength Characteristics of Structural Steel – A. D. Chudnovskii and I. M. Rafalovich	24	27
Method for Determining the Changes in the Energy Stored by a Metal during Plastic Deformation – Laiosh Kator and Pal Nyulas	28	31
Calculation Method for the Strength of Materials Containing Cracks – E. M. Morozov	32	35
Ratio of Durabilities of Hard Alloys under Repeated Impactive and Harmonic Loadings –V. T. Troshchenko, V. N. Bakul', and M. G. Loshak	38	41
Plasticity of D16T Aluminum Alloy during Biaxial Extension at Low Temperatures – G. S. Pisarenko, B. I. Koval'chuk, and A. A. Lebedev	42	45
Deformability and Strength of Soft Filament-Reinforced Plastics in Biaxial Tension – E. S. Umanskii and S. S. Veremchuk	47	50
Approximate Solution of the Thermoelasticity Boundary-Value Problem for a Plane with a Doubly Periodic System of Apertures – V. M. Panferov, V. N. Kuznetsov, and E. Z. Korol'	54	57
The Bending of Rectangular Plates Subject to Temperature Change – É. I. Grigolyuk, V. M. Kulakov, and V. E. Polovich	60	63
Temperature Stresses in a Plate with a Variable Heat-Transfer Coefficient – Yu. M. Kolyano and V. I. Kapinos	68	70
Transverse Deformations – V. A. Kuz'menko	71	73
Propagation of Longitudinal Elastic Stress Waves in Bars – V. G. Petushkov and G. V. Stepanov	76	78
INDUSTRIAL SECTION		
Engineering Method of Calculating the Stress Concentration Factor with Consideration of Ductility and Creep – G. D. Del', B. P. Chebaevskii, and A. F. Pronkin	80	82
Structural Properties of Steel 35KhGSL Castings – A. A. Get'man and R. F. Pen'kov	84	86
Determination of Thermal Stability and Thermophysical Characteristics of Corundum Materials – G. A. Gogotsi, L. A. Kozdoba, and F. A. Krivoshei	89	92
VRD-500 Apparatus for Strength Testing Impellers of High-Speed Turbines – G. S. Vasil'chenko, L. L. Chernyavskii, V. S. Romanov, and N. S. Mart'yanov	94	97
Apparatus for Symmetric Tension–Compression Cycle Fatigue Tests at 10 kHz with Heating – A. I. Afonin	98	101
Equipment Suitable for Testing Reinforced Plastics and Their Binders at High Temperature – V. S. Nosal'skii	102	105

Engl./Russ.

Apparatus for Measuring the Elastic Constants of Small Samples of Isotropic Materials at Temperatures to 1700°C – Yu. V. Miloserdin, V. M. Baranov, and O. S. Korostin 104 107

Investigation of the Elastic Properties of Carbonaceous Materials during Heat Treatment – G. G. Zaitsev, V. N. Barabanov, and A. N. Deev 107 110

Investigation of Tightness of Riveted Joints with Cover Plates – V. P. Potelezhko and B. P. Solonets 111 114

BRIEF COMMUNICATIONS

Imprint Recovery in Ball-Type Hardness Tests – M. P. Markovets, V. S. Kovalenko, A. L. Geller, and G. E. Rybalka 116 118

CHRONICLES

Conference on the Problem of Fatigue of Metallic Materials in the Case of Cyclic Impact Loading – V. D. Rudnev 119 121

BOOK REVIEWS

M. L. Bernshtein and V. A. Zaimovskii – *Structure and Mechanical Properties of Metals* - Reviewed by I. V. Kudryavtsev 121 123

Volume 3, Number 2 February, 1971

SCIENTIFIC AND TECHNICAL SECTION

Failure of Materials in the Case of Cyclic Heating and Cooling – G. S. Pisarenko and N. S. Mozharovskii 123 3

Mathematical and Experimental Models of Fracture – V. V. Bolotin 133 13

Resistance to the Low-Cycle Strain and Fatigue – R. M. Shneiderovich 140 21

Investigation of the Failure of Gas Turbine Blades under the Effect of Thermal Changes – G. N. Tret'yachenko 147 28

Thermal Activation of Microcrack Nucleation in Crystals – V. I. Vladimirov and A. N. Orlov 154 36

Time and Temperature Dependence of Strength in Solids – V. I. Betekhtin and S. N. Zhurkov 157 39

Micromechanics of the Failure of Polymers – S. N. Zhurkov, V. S. Kuksenko, and A. I. Slutsker 162 45

Measurement of Stresses at the Tip of Main Cracks in Polymers by the Spectroscopy Method – V. E. Korsukov and V. I. Vettegren' 168 51

Certain Problems of Long-Term Strength of Viscoelastic Media – V. V. Moskvitin 172 55

A Possible Theory of Prolonged Failure – V. P. Tamuzh 177 59

General Theory of Criteria of Strength for Isotropic and Anisotropic Materials – I. I. Gol'denblat and V. A. Kopnov 184 65

Some Basic Problems of the Linear Mechanics of Fracture – G. P. Cherepanov 189 70

Resistance to Low-Cycle Fatigue at High Temperatures – V. M. Filatov and R. M. Shneiderovich 194 74

Temporal Effects in Brittle Fracture – R. L. Salganik 200 79

Evaluation of the Effect of Static Loads on the Thermal Endurance of Gas Turbine Operating under Varying Temperature Conditions – G. N. Tret'yachenko and A. P. Voloshchenko 207 86

Aspects of the Deformation of High-Temperature Steels under Conditions of Nonisothermal Creep – V. N. Kiselevskii and A. F. Chuprina 212 91

Local Effects of Initial Stress Distribution in the Zone of Matrix Reinforcement by the Fiber – É. S. Umanskii, L. M. Lobanov, and E. I. Zaluzhnaya 217 96

The Elastic Stress Field in the Plane Contact Problem – V. N. Kuznetsov 221 100

Engl./Russ.

The Limiting Twisting Moment of a Straight Beam with a Circular Cross Section having a Circular Indentation – B. A. Obodovskii and G. V. Artyukh 226 106
Speed of Propagation of Elaso-plastic Shock Waves in Metals – G. V. Stepanov 229 109

PRODUCTION

Runaway Tests on Disk Models of ÉP631 Steel – E. E. Levin, A. D. Kazenina, P. S. Kuratov, G. I. Gurevich, I. G. Generson, and P. M. Libman 233 113
Features of the Destruction of Ductile and Brittle Materials by Cavitation – S. L. Milichenko, A. G. Aleksandrov, and I. V. Pin'kovskii 236 117

BRIEF COMMUNICATIONS

The D13 Installation for Studying the Damping Properties of Materials Subjected to Torsional Vibrations – A. I. Bykovskii and B. S. Shul'ginov 240 120

Volume 3, Number 3 March, 1971

Energy Criteria for Failure in Cyclic Loading. A Review – A. N. Romanov 245 3
A Study of the Accumulation of Fatigue Damage in Relation to the Conditions of Service Load – É. Ya. Filatov, V. É. Pavlovskii, and Yu. A. Panfilov 252 10
Effect of Main Machining Operations on the Surface Finish and Fatigue Life of Compressor Blades Made from 1Kh17N2 Steel – E. Ya. Korenevskii and V. K. Yatsenko 257 15
Application of the Deformation Theory of Fatigue to Test Conditions at Stresses Less Than the Elastic Limit – L. B. Getsov 263 21
Use of Fractography for Studying the Kinetics of Failures of Light Alloys – T. A. Gordeeva, I. P. Zhegina, and T. A. Volodina 267 25
Rupture of Fibrous Materials – S. T. Mileiko 272 30
Constructing a Theory for the Strength of Unidirectionally Reinforced Materials in Compression – A. N. Guz' 278 37
Elastic Properties of Compact Bone as an Anisotropic Material – A. A. Uten'kin and A. A. Sveshnikova 281 40
Mechanical Properties of Materials at Low Temperatures – P. F. Koshelev 286 45
Poisson's Ratio for Carbon Steel and Gray Iron at Normal and Low Temperatures – A. A. Lebedev, B. I. Koval'chuk, and V. P. Lamashevskii 292 51
The Mechanical Properties and Failure of Mild Steel in Tension – A. Ya. Krasovskii, V. A. Stepanenko, and A. G. Voinitskii 298 57
Influence of Microadditives of Li, La, P, and B on the Strength and Plasticity of Copper – M. A. Krishtal, M. A. Vyboishchik, and A. L. Zolotoi 304 63
The Effect of Temperature and Deformation Rate on the Flow Stress of Erbium – L. D. Sokolov, V. M. Solenov, A. N. Gladkikh, and V. A. Skudnov 308 67
Load Bearing Capacity of Rotating Shells Made from Rigid-Viscoplastic Reinforced Materials – O. N. Shablii 312 71
One Method of Solving Problems on Cracking and Stamping in the Moment Theory of Elasticity – V. Z. Parton and B. A. Kudryavtsev 320 78
Stresses and Strains in an Elastic Inclined Shell of Constant Torsion with Stable Heating of Its Edges – B. A. Gushchin and V. M. Rassudov 325 82

INDUSTRIAL SECTION

Fatigue Strength of the Material Used for Large Hollow and Solid Shafts – V. A. Masol, I. V. Kudryavtsev, M. Ya. Belkin, V. N. Tarasova, and N. M. Savvina 330 86
The UIT-1200/50 Device for Determining the Heat Resistance of Sealing Materials – N. L. Golego, M. E. Belitskii, E. I. Kuznetsov, G. A. Volosovich, and A. P. Voidenov 335 92

Investigation of the Strength of Corrugated Expansion Pieces for Low Cyclic Loading – A. P. Gusenkov and N. N. Velichkin 340 97
Calculation of the Strength of the Force Elements in Gas-Detonation Presses – G. V. Stepanov, V. G. Petushkov, Yu. B. Trakhtenberg, and B. Ya. Maksimov ... 346 103
An Apparatus for Investigating Material Properties under Explosive Loading – N. A. Fot and V. V. Yarosh 350 107

BRIEF COMMUNICATIONS
Quantitative Appraisal of Impairability of a Material under Cyclic Loading – I. M. Vasinyuk and I. S. Sulik 353 110
Setup for the Fatigue Testing of Sheet Materials Subjected to Pure Bending – V. A. Samgin and I. A. Troyan 355 111
Effect of a High Vacuum on the Deformation of Copper and Aluminum – A. V. Ashukin, A. A. Guslyakov, Ya. M. Kulish, and I. M. Lyubarskii 358 113
The Problem of the Effect of Diffusional Chromizing and Vanadizing on the Fatigue Strength of Steel – V. I. Pokhmurskii, V. B. Dalisov, T. N. Kalichak, and V. I. Didoshak 361 116
Recording the Displacement of a Surface under a Pulsed Load by a Photomicrographic Method – G. V. Stepanov 363 118
Investigation of the Deformation of Aluminum by the Etch-Pit Method – E. Ya. Yakovlev 365 120
The Influence of Metallic Coatings on the Fatigue Limit of VD17 Aluminum Alloy – P. A. Averchenko, B. A. Treskunov, and V. M. Pleskach 368 122

Volume 3, Number 4 April, 1971

SCIENTIFIC-TECHNICAL SECTION
Resistance of Construction Elements to Brittle Failure – S. V. Serensen and N. A. Makhutov 371 3
The Strength of Brittle Plates with Stochastic Distribution of Crack Defects – P. M. Vitvitskii 382 13
Effect of Relieving Apertures on Crack Development – V. M. Mirsalimov 387 18
Characteristics of Mechanical Tests on Construction Materials over a Wide Range of Low Temperatures – N. V. Novikov, M. M. Aleksyuk, A. G. Voinitskii, B. I. Koval'chuk, M. D. Mitlikin, and L. I. Zarubin 390 20
Characteristics of Brittle Failure in Relation to Constructional Factors – B. F. Belyaev, N. A. Makhutov, and O. N. Vinkler 397 27
Evaluating the Cold Resistance of Steels in Terms of Impact Strength – Yu. A. Shul'te, V. V. Lunev, A. A. Shalomeev, E. I. Menyailo, and N. I. Azarov 402 32
Durability of Titanium Alloy in Vacuum at Low and Elevated Temperatures – N. M. Grinberg, V. M. Boichuk, N. A. Tsurikov, P. S. Sologub, B. V. Gladkikh, and V. E. Popirnyi 406 36
Deformation Hardening of Copper at Low Temperatures – V. I. Dotsenko, V. V. Pustovalov, and V. F. Statinova 411 41
Anisotropy in the Elastic Properties of Titanium and Its Alloys on Cooling from 20° to −196°C – N. V. Novikov and A. F. Voitenko 418 47
The Mechanical Properties of Brazed Joints on Some Alloy Steels at Temperatures down to −253°C – Yu. I. Korunov and N. A. Bareskov 421 49
The MUVR and MUVK Fatigue Machines for Testing at Low Temperatures in Vacuum – V. M. Boichuk 425 53
Predicting Creep in Refractory Metals – V. I. Kovpak 429 56
A Single Criterion for the Long-Term Strength of Metals and Alloys – A. M. Borzdyka. . 436 64

Experimental Investigation of the Limits of the Supporting Capacity of Anisotropic Alloy AMts in the Case of Combined Stress and Various Loading Trajectories – N. Z. Lebedev 440 67
Thermal Stress Relaxation in a Complex Stressed State – G. P. Mel'nikov and V. B. Gorlov 443 70
Steel Testing for Low Cyclic Fatigue – E. I. Molchanov and A. A. Salamov. 447 74
Phase Work-Hardening in Brittle Fracture of High-Chromium Ferrite – A. L. Bondarenko 449 76
Mechanical Properties of Glassceramic in Bending, Tension, and Compression – V. S. Kashperskii, N. V. Skvortsova, and A. E. Zhuravel' 453 80

PRODUCTION SECTION
Bearing Capacity of a Spiral Heat Exchanger with a Rigid Core and Flat Tube Lattices – O. S. Suvorova and V. A. Freitag 457 84
Effect of Low Temperatures and Loading Rates on Strength of Specimens with Different Types of Threads – G. V. Karpenko, Z. G. Dutsyak, S. Ya. Yarema, Z. M. Manyuk, and Yu. I. Babei 462 89
Experimental Investigation of the Strength of Short Thin-Walled Cylinders, Subjected to Radial Internal Pressure – A. G. Mazepa and I. V. Kudryavtsev. 466 93
Stressed State of a Cylindrical Shell Supported by Radial Ribs Connected to the Jacket by Means of Radial Junctions – Yu. D. Korablev. 471 98
Determination of Stress in the Plastic Deformation of a Turbine Disk from Its Hardness – G. D. Del', B. P. Chebaevskii, V. D. Del', and A. F. Pronkin. 476 102
Bending Fatigue Testing Methods for Sheet Metal at Normal and Elevated Temperatures – V. A. Samgin. 479 105
Device for Studying the Creep Strength of Constructional Materials under Irradiation – S. N. Votinov, N. P. Losev, V. I. Prokhorov, B. V. Samsonov, V. A. Tsykanov, and A. G. Fin'ko. 483 109

BRIEF COMMUNICATIONS
Measuring Dynamic Loading Using Strain Gages – V. G. Petushkov and N. A. Fot. 487 113
Bending Durability – G. F. Lepin and Yu. D. Bondarenko 490 116

CHRONICLES
Technical Progress and the Creation of Equipment for the North – E. A. Kushchev 492 118

Volume 3, Number 5 May, 1971

SCIENTIFIC-TECHNICAL SECTION
Determination of Oscillation Damping Parameters – G. S. Pisarenko and O. E. Boginich 495 3
Various Methods of Calculating the Internal Friction in Oscillating Elastic Systems – E. S. Sorokin and B. A. Al'tshul' 503 11
Simulation of the Oscillations of Elastic – Hysteresis Systems – A. A. Samarin, V. F. Rakhmanov, and Yu. A. Kozlov 506 13
Internal Friction on Maraging Fe – Cr – Ni Steels – V. M. Kondratov 511 18
The Function of Losses in the Surface Layers of a Material, with a Study of the Influence of Dimensions of the Bar on Vibration Damping – V. V. Matveev and O. T. Bashta 516 23
Investigation of Stationary Nonlinear Vibrations in Systems with Distributed Parameters in the Presence of Internal Resonance – N. V. Vasilenko 524 30
Some Features of Metal Behavior in the Initial Stages of Plastic Flow Using the Internal-Friction Method – M. A. Krishtal and A. N. Kharitonov 530 35

Engl./Russ.

Calculating Energy Dissipation for the Complex Stressed State – V. V. Khil'chevskii and V. G. Dubenets 534 39
Use of the Nonlinear Theory of Viscoelasticity for Describing Mechanical Losses in Polymer Materials – S. P. Gun'kin, A. P. Molotkov, Yu. V. Zelenev, and G. M. Bartenev 540 44
Effect of Small Elastoplastic Cyclic Deformations on Energy Dissipation in Metals – B. S. Shul'ginov 543 47
Application of the Aging Theory to a Description of Creep of Anisotropic Materials – O. V. Sosnin and I. K. Shokalo 547 51
Analysis of the Processes of Deformation and Rupture of Material after Prolonged Prestressing – G. G. Maksimovich, V. S. Pavlina, and E. M. Lyutyi 553 56
Rating the Long-Term Strength of Constructional Materials Inside a Reactor – S. N. Votinov, N. P. Losev, V. I. Prokhorov, B. V. Samsonov, V. A. Tsykanov, and A. G. Fin'ko 558 61
Method for Determining the Strength of Gas Turbine Blades under Heat Transfer and Vibrational Conditions – A. I. Petrenko 562 65
Stress Concentration and Calculation of Reinforcement Elements of Holes in Shells and Bottoms Operating under an Internal Pressure – G. I. Fedenko 568 70
Investigation of the True Strength Characteristics of Some Heat-Resistant Alloys at High Temperatures – V. N. Rudenko and A. S. Spivakov 576 77
Construction of Relaxation Curves under Tensile Strain from the Results of Tests on Annular Samples – G. F. Lepin and Yu. D. Bondarenko 580 81
The Influence of Preliminary Plastic Deformation on the Inelastic Properties of Metals – A. V. Gur'ev and V. I. Vodop'yanov 584 85
Aspects of the Strengthening of Nickel by Thermocycling Treatment – O. I. Kozyrskii and P. N. Okrainets 589 90
Effect of Preliminary Deformation on the Hardening of Commercial Iron during Natural Aging – Yu. P. Gul' 593 94
The Effect of Titanium on the Ductility of Low-Alloy Steel – M. N. Georgiev, L. V. Popova, V. N. Nikitin, and D. A. Litvinenko 597 98

MANUFACTURING SECTION

The Effect of Process Treatment upon the Fatigue Strength of Heavy Carbon Steel Shafts – V. A. Masol, M. Ya. Belkin, and V. N. Tarasova 600 101
Investigation of the Effect of Loading Frequency on the Fatigue of Heat-Resisting and High-Temperature Steels and Alloys at Operating Temperatures – A. M. Sulima, M. I. Evstigneev, and G. Z. Serebrennikov 606 107
A Method of Investigating the Vibration of Flat Turbine Blading in High-Temperature Gas Streams – A. A. Kaminer and N. Ya. Nastenko 610 111
Film-Thermocouple Measurement of Surface Temperatures in Thermal Fatigue Tests – D. F. Simbirskii and L. S. Grigor'ev 613 114

BRIEF COMMUNICATIONS

Model Description of Viscoelastic Properties of Mechanical Mixtures of Polymers – A. B. Aivazov, S. P. Gun'kin, Yu. V. Zelenev, and G. M. Bartenev 617 117
Relaxation Oscillator for Measuring the Amplitude, Temperature, and Frequency Dependences of Internal Friction – S. S. Golovin and S. I. Arkhangel'skii 620 120
Energy Dissipation in Polymers Undergoing Electromagnetically Excited Vibration – S. K. Abramov and Yu. V. Efremushkin 624 123

Volume 3, Number 6 June, 1971

SCIENTIFIC-TECHNICAL SECTION

Stresses in Cooled Turbine Blades – I. A. Birger, V. V. Dzhamai, and L. P. Selifonova 627 3

Investigation of the Distribution of Bending Forces in Fir-Tree Connections of Turbine Blade Roots – M. S. Kovalev and V. V. Matveev. 631 7
Calculation of Sectional-Type Nozzle Apparatuses with Diaphragms – A. M. Kaminskii. . 637 13
A New Approach to the Description of the Hysteresis Loop in the Theory of Mechanical Oscillations – G. S. Pisarenko. 646 21
Damping Behavior of Some Nickel-Base Heat-Resisting Alloys at High Temperatures – G. E. Vizerskaya 649 23
Nonstationary Processes in Forced Vibration of Rods under Elastoplastic Conditions – Yu. A. Klikh and N. V. Vasilenko 653 28
Regularities in the Failure and Deformation of Refractory Alloys in a Highly Plastic State under a Low-Cycle Fatigue Load – V. T. Troshchenko, V. A. Strizhalo, and D. P. Sinyavskii 657 32
Relationship between Normal Elastic Modulus of Sheet Molybdenum and Temperature – I. S. Malashenko, V. N. Statkevich, and G. N. Nadezhdin. 663 38
Short-Time Strength, Hardness, and Elastic Moduli of Tungsten–Molybdenum Alloys at Normal and High Temperatures – V. K. Kharchenko, V. A. Borisenko, Yu. A. Kashtalyan, and V. A. Dreshpak 667 42
The Mechanical Properties of W–C Alloys – V. N. Pod'yachev, M. I. Gavrilyuk, and A. T. Gorbadei. 671 46
The Effect of the Size Factor on the Mechanical Properties of Molybdenum – E. E. Zelenyuk and V. N. Rudenko 674 49
Effect of Heating on the Strength and Elastic Properties of the Alloys VM-1 and VN-2 – M. M. Aleksyuk and V. A. Dreshpak 677 52
High-Temperature Creep and Long-Term (Creep) Strength of the Niobium Alloy 5VMTs – V. V. Krivenyuk, I. S. Tsvilyuk, and V. I. Pyl'nikov. 680 54
Investigation of the Fatigue Limit and Vibration Creep of ÉI826 Alloy Tested on a Basis of 10^9 Cycles at High Temperatures – A. A. Ivanov and I. A. Troyan 686 60
Change in the Structural State of Steel 45 by the Action of Ultrasonic Vibrations at Room Temperature – V. N. Semirog-Orlik, A. F. Chuprina, and N. L. Pozen 689 63
Beam Flexure for Materials Possessing Different Creep Characteristics in Tension and Compression – A. F. Nikitenko and O. V. Sosnin 693 67
Study of the Stressed State of the Flanges of Shells of Rotation by the Photoelastic Method – V. I. Savchenko, A. E. Zhuravel', S. G. Shokot'ko, and G. V. Oleinik . 698 71
Action of a Local Load on a Reinforced Cylindrical Shell – V. N. Khitrov 704 77
Calculation of the Rate of Heat Transfer in Determining the Two-Dimensional, Dynamic Thermal Stresses in a Semiinfinite Plate – Yu. M. Kolyano and O. F. Girnyak. . . 710 82
Calculation of Shafts with Shear Stresses Due to Bending Taken into Account – L. I. Turiyanskii 714 85

INDUSTRIAL SECTION
The Frequency Spectra and Modes of Natural Vibration of Turbine Rotors – S. I. Bogomolov. 717 88
Experimental Study of Stresses in a Glass–Crystalline (Sitall) Shell – A. E. Zhuravel', G. V. Isakhanov, Z. D. Kostyuk, and E. K. Bocharov 722 94
How Alloying with Carbon and Zirconium Carbide Affects the Cold Shortness of Cast Molybdenum – O. A. Belous, O. G. Danilovtseva, V. A. Kuznetsova, M. V. Mal'tsev, V. N. Minakov, V. I. Trefilov, A. A. Khachaturov, and A. A. Shchukin. 725 97
Strength of Niobium and a Dilute Niobium Alloy under Cyclic Stress – S. M. Gurevich, M. M. Nerodenko, E. A. Asnis, S. V. Smirnov, and M. D. Rabkina 730 102
Effect of Method of Producing Blanks on the Mechanical Properties of Heat-Resistant Alloys – A. F. Belov, N. D. Bobovnikov, and O. Kh. Fatkullin 733 105
A Machine for Testing Materials at Low Temperatures under Combined Tension and Torsion – A. M. Zhukov and L. L. Dubrovin. 738 110

Investigating the Elastic Constants of Steel Cable at Low Temperatures – A. P. Nazarenko and V. G. Komarenko 741 113
Optical Recording of Vibrations – R. K. Ivashchenko, N. L. Pozen, A. P. Yakovlev, and V. V. Matveev 744 116

CHRONICLES

Dissertations on Problems of the Strength of Materials and Design Elements Presented by Members of the Institute of Strength Problems of the Academy of Sciences of the Ukrainian SSR in 1970 – R. R. Kocherovets 749 120

BOOK REVIEWS

G. S. Pisarenko, V. A. Borisenko, S. S. Gorodetskii, B. A. Gryaznov, V. P. Dubinin, Yu. A. Kashtalyan, V. V. Krivenyuk, V. N. Rudenko, V. A. Strizhalo, V. T. Troshchenko, E. I. Uskov, and V. K. Kharchenko – The Strength of Refractory Metals – reviewed by E. M. Savitskii 754 124

Volume 3, Number 7 July, 1971

Creep and Long-Term Strength of a Fibrous Composite – S. T. Mileiko 755 3
Study of Local Effects Involving Interaction between the Filaments and the Matrix in Composite Materials: 1 – É. S. Umanskii, E. I. Zaluzhnaya, and S. M. Medovaya. 764 11
The Local Effects of Fiber–Matrix Interactions in Composites: 2 – É. S. Umanskii, E. I. Zaluzhnaya, and S. M. Medovaya 772 18
Model of a Microheterogeneous Elastoplastic Medium Describing the Fatigue Behavior of a Hardening Material at Unsteady Alternating Stress Amplitudes – N. N. Akhmediev 776 22
Strength and Deformability of Fiberglass under Shear – G. V. Bilida 787 33
Mechanical Losses in Polymers Containing Hard Fillers – A. P. Molotkov, V. P. Moskvin, Yu. V. Zelenev, and G. M. Bartenev 793 39
On Estimating the Effect of the Stressed State of the Coating on the Strength and Ductility of a Composite Material – Yu. I. Kozub 796 42
Effect of the Properties of Materials and Manufacturing Technology on Structural Strength – N. D. Kuznetsov. 802 47
The Strength of Cast Gas Turbine Engine Blades under Alternating Loads – T. P. Zakharova and B. F. Balashov 810 55
Fatigue Strength of Model Active Gas Turbine Blades Subjected to Programmed Temperature Changes Close to Operating Temperatures – B. N. Sinaiskii 816 62
Some Special Features in the Failure and Cracking of Compressor Discs under Variable Stresses – T. K. Bragina and B. F. Balashov 823 69
Investigation of Post-Service Condition of Turbine-Disk Material – I. A. Kozlov, V. N. Rudenko, and G. V. Rybenok 831 78
Determining the Thermal Stability of the Material of Hollow Cylinders Taking into Account the Statistical Nature of Refractory Strength – K. A. Kazakyavichyus, V. I. Dauknis, V. L. Yurenas, and G. A. Prantskyavichyus 836 83
Time–Temperature Extrapolation of Stress-Rupture of Heat-Resistant Materials – V. I. Kovpak 842 88
A Comparison of the Damping Capacity and the Mechanical Properties of Several Structural Steels – V. M. Zlygosteva, I. B. Kekalo, I. S. Kurakin, Yu. K. Favstov, and V. G. Chernashkin 848 94
One Method of Determining the Characteristic (Eigen) Frequencies of a Plate Lying on an Elastic Base – A. G. Kolesnik 853 98

PRODUCTION SECTION

A Nickel Base Heat Resistant Composite Material – V. M. Chubarov, Yu. V. Levinskii, S. E. Salibekov, A. F. Trefilov, L. V. Grachev, E. M. Rodin, M. Kh. Levinskaya, and L. V. Dvoichenkova 856 100

Evaluating the Working Capacity of Steam Pipes of Perlitic Steels after Prolonged Operation – P. A. Antikain, L. I. Ryabova, and A. V. Aksenov 860 105

Investigation of the Strength and Ductility of Heterophase Cast Molybdenum with Special Reference to Crystallographic Orientation – V. N. Statkevich, A. L. Kuporev, I. S. Malashenko, and N. P. Vashchilo 866 110

Strengthening Chromium Steel by Alloying – G. K. Gaiduchenko, M. P. Braun, and B. B. Vinokur 871 115

BRIEF COMMUNICATIONS

Long-Term Strength of Polystyrene in the Plane-Stressed State – V. D. Glebov and S. A. Elsuf'ev 875 119

Effect of Heat Treatment on the Fatigue Limit of Alloy D16AMO – V. A. Samgin and L. E. Matokhnyuk 877 121

CHRONICLES

The Results of the Scientific and Technical Conference on the Design Strength of Engines 880 124

Volume 3, Number 8 August, 1971

SCIENTIFIC AND TECHNICAL SECTION

Analysis of the State of Torsional Stress in Bodies of Revolution. Communication 1. – A. L. Kvitka and L. E. Kiyashko 883 3

Modeling of Ribbed Cylindrical Shells – V. A Zarutskii 888 8

Design of Optimum Disks in Relation to Creep – Yu. V. Nemirovskii 891 11

Investigation of the Stress Distribution in Disk Fillets – I. A. Kozlov, V. N. Gorodetskii, and V. L. Akhremenko 895 14

Approximate Calculation of the Strength of Friction Pulley Shells by the Elementary Parameters Method – F. L. Shevchenko 899 18

Stability of Cylindrical Shells Reinforced with Longitudinal Ribs and Exposed to Axial Compressive Forçes – V. I. Matsner and P. S Polyakov 904 22

Dynamic Thermal Stresses in Elastoviscous Semiinfinite Thin Plates with Finite Velocities of Heat Propagation – Yu. M. Kolyano and M. M. Semerak 909 27

Mathematical Model of Granular Composite Materials – R. I. Budeshtskii 912 30

The Scale-Effect in Uncompressed Polystyrene Foam under Tensile Stress – I. G. Romanenkov, P. V. Godilo, K. V. Kozlov, and N. P. Egorkin 917 35

The Effect of Small Porosity on the Strength of Brittle Ceramic Materials – A. Ya. Peras and V. I. Dauknis 921 38

The Scale Effect in Metalloceramic Hard Alloys of the Tungsten Group – M. G. Loshak and V. M. Fridman 926 43

Regularities in the Variation of Transverse Strain Coefficients – V. A. Kuz'menko 931 48

Equation of the Neck Profile of Tensile Specimens – I. G. Dondik 937 54

Effect of the Fineness of Pearlite Structure on the Temperature of Cold Shortness of Carbon Steel – V. N. Gridnev, Yu. Ya. Meshkov, G. A. Pakharenko, and Yu. N. Petrov 941 57

Investigation of the Temperature–Velocity Dependence of the Characteristics of Strength and Plasticity of Lutetium – V. M. Solenov, V. A. Skudnov, L. D Sokolov, and A. N. Gladkikh 945 61

Concentration of Thermal and Mechanical Stresses in Graphites – V. A. Ursin, D. A Trapeznikov, D. V. Kochetov, and Yu. P Anufriev 948 64

Temperature Dependence of Strength of Notched Specimens – A. N. Gladkikh, V. N. Gurashov, V. N. Dubinskii, and L. D. Sokolov 951 67
The Impact Strength and the Transition to Cold Brittleness in Molybdenum – A. P Gulyaev, N. N. Morgunova, and N. M. Malkhasyan 955 70
Change in the Mechanical Properties of Austenitic Stainless Steels and Alloys Resulting from the Martensitic Transformation at Low Temperatures – V. Ya. Il'ichev, L. V Skibina, and V. I. Startsev 959 74
The Effect of Some Technological Factors on the Fatigue Strength of Titanium Alloys – D. Ya. Bragin, N. Z. Loginov, and I. N. Shkanov 963 78
Study of Resistance of Metals to Hot Plastic Deformation by Methods Based on the Theory of Experiment Planning – V. A. Masterov and I. K. Suvorov 968 83

PRODUCTION SECTION
Effect of Sheet-Specimen Geometry on Plasticity and the Deformation Curve – V. G. Osipov and E. I. Lyafer 974 88
The Critical Condition of the Safe Parameters in Heating Simple Shaped Bodies – V. M. Guba and Yu. S. Postol'nik 981 95
Facilities for Low-Temperature Fatigue Tests (Down to –60°C) on Metals and Structural Components – M. M. Kobrin, I. P. Matrosov, and E. A. Vikman 986 99
Electric Hydraulic Rigs for Vibrostrength Tests – A. S. Shaginyan, A. G. Asan-Dzhalalov, and A. A. Pevniev 991 105
Mechanical Properties of Heat-Resistant Castings – G. V. Kulygin, V. A. Bespyatyi, L. I. Tuchinskii, V. A. Samgin, and N. N. Pis'mennyi 997 111

BRIEF COMMUNICATIONS
Pure Bend Instability in Sheet – A. A. Medvedev 1000 114
Tensometer for Measuring Cyclic Deformation – B. S. Shul'ginov 1004 117
A Device for Recording Deformation Diagrams in Tensile Tests – V. N. Rudenko 1006 118

Volume 3, Number 9 September, 1971

Large Strains in an Ideally Elastic Body – I. Ya. Amiro and A. P. Varvak 1009 3
Calculating the Strength of Pressure Vessels in the Presence of Cracks – E. M. Morozov 1013 7
The Stress and Plastic Deformation Kinetics for aCyclically Hardening Material with Rigid Symmetrical Loading – N. N. Akhmediev 1019 12
Effect of a Variable Temperature–Force Regime on the Durability of Constructions – G. P. Mel'nikov 1023 15
Relation between Deformation Kinetics and Size Effect – A. B. Zlochevskii 1028 19
Developmental Patterns of Microscopically Inhomogeneous Deformation of Polycrystalline Alloys – L. V. Kuksa 1032 23
Calculation of a Self-Oscillating System of a Fatigue Testing Machine – V. I. Litvak 1035 26
Analytic Study on the Stressed State of Engine Parts in the Zone of Sharp Grooves and Cracks – F. S. Edigaryan and V. V. Kovalev 1041 31
The Relation of Impact Strength to Other Mechanical Characteristics – O. D. Khlopotov 1044 34
Calculation of Nonstationary Thermoelastic Stresses in the Wall of a Semicylinder – Yu. P. Kotel'nikov 1050 39
Characteristics of the Deformation of One-Dimensional Constructions, Allowing for the Thermoviscoelastic Effect – V. V. Kryuchkovskii and P. I. Khristichenko 1055 44
Relation between the Activation Energies of High-Temperature Creep and Diffusion in Transition Metal Carbides – P. V. Zubarev and L. N. Dement'ev 1058 47
The Effect of the States of Stress and Strain on the Elastic Modulus of Steel – V. N. Bastun and N. I. Chernyak 1062 52

The Dependence of the Endurance of Chromium–Nickel Steels on the Refrigeration Temperature (Down to –269°C) – L. P. Andreev and N. V. Novikov 1066 56
On the Failure Strength [K_{1C}] of High-Strength Aluminum and Titanium Alloys at Low Temperatures – V. I. Smolentsev and V. G. Kudryashov 1073 63
Damping of Vibrations of a Hollow Curvilinear Bar with Nonlinear Supports – V. S. Shmelev 1077 67
Transmission of Forces from a Stringer of Variable Cross Section to a Plate – É. I. Grigolyuk and V. M. Tolkachev 1081 71
Method of Exciting Plane Elastoplastic Stress Waves in Solids – G. V. Stepanov 1086 75

PRODUCTION SECTION
Tendency of Complex-Alloyed Steels to Brittle Fracture – M. P. Braun, B. B. Vinokur, L. V. Khaustova, and A. L. Geller 1090 79
Effect of Energy Stored in the Loading System on the Life of Welded Rod Joints at 20 and –30°C – M. M. Kobrin and Zh. M. Gimervert 1095 84
Effect of the External Pressure of a Liquid on Cyclic Strength of Metals with Low-Cycle Loading – V. S. Utkin and L. S. Moroz 1100 89
Axial Force Distributions on Connection Elements of the Bolt – Nut Type – V. M. Aranovich 1103 93
Creation of Residual Stresses in Titanium Alloys on Cutting and Subjecting to Surface Plastic Deformation – N. F. Sidorov and P. Ya. Surai 1110 99
Relation between the Energy Capacity of Metals and Alloys and Their Resistance to Abrasive Wear – V. S. Popov, P. L. Nagornyi, A. B. Shumikin, V. A. Guk, and S. M. Popov 1114 103
A Method of Recording Creep Curves and Cyclic Deformation Diagrams in Repeated Static Loading – V. A. Strizhalo and L. F. Shestopal 1120 109
An Investigation of the Influence of Temperature, Cycle Asymmetry, and Stress Concentrators on the Fatigue Strength of ÉI726 Steel (1Kh14N18V2BR1) – B. A. Gryaznov, L. A. Kaplinskii, and I. A. Troyan 1123 113
An Investigation of the Endurance of D16AMO Alloy under an Acoustic Load – L. E. Matokhnyuk, Yu. A. Kashtalyan, and V. A. Samgin 1126 116

BRIEF COMMUNICATIONS
The Relation between Microhardness and Flow Stress in Copper at Low Temperatures – I. A. Gindin, Ya. D. Starodubov, and P. A. Khaimovich 1131 121
Device for Testing Fatigue Strength under Shock Loading – M. G. Loshak, V. M. Fridman, and A. P. Kozlov 122

BOOK REVIEWS
A. D. Kovalenko – Fundamentals of Thermoelasticity 1134 124

Volume 3, Number 10 October, 1971

SCIENTIFIC-TECHNICAL SECTION
Study of the Kinetics of Arterial Crack Growth in Polymers. I. Development of Through Cracks in Thin Polymer Films under Static Tension – V. R. Regel', A. M. Leksovskii, and O. F. Kireenko 1137 3
Study of the Kinetics of Arterial Crack Growth in Polymers. II. Fractographic Study of the Kinetics of Crack Growth – V. R. Regel', A. M. Leksovskii, and O. F. Kireenko 1145 12
Study of the Kinetics of Arterial Crack Growth in Polymers. III. Rules Governing Crack Growth under Cyclic Tension – V. R. Regel', A. M. Leksovskii, and O. F. Kireenko 1149 16

The Strength of Materials under Water Drop Impact Action – R. G. Perel'man and Yu. D. Denisov 1153 20
The Problem of Determining the Curve of the Limiting Stress Condition Producing the Appearance of Areas of Localized Plastic Deformation (Slip Planes) – M. L. Gorb, A. A. Ostrovskii, and N. I. Chernyak 1160 27
Asymptotic Estimate of Stress Concentration Near Dents – O. I. Pal'chikov 1165 32
Bearing Capacity of Shallow Variable-Thickness Shells of Revolution – P. F. Kupriichuk and O. N. Shablii 1171 38
Study of the Working Capacity of High-Velocity Radial Bearings with Hollow Rollers – V. A. Pikovskii, V. G. Kustov, E. V. Leonov, V. V. Shashkin, and I. V. Zinov'ev . . . 1178 45
Determination of Creep Stresses in Turbine Frame Parts – V. S. Balina 1186 53
Long Turbine Blades with Nonlinear Geometry Subject to Pure Bending and Torsion – P. I. Tatarinov 1190 57
Influence of Certain Factors on Energy Dissipation during Elastic Vibrations in Magnesium Alloys – M. E. Drits, L. L. Rokhlin, V. V. Sheredin, and Yu. N. Shul'ga . 1195 62
Effect of the Shape of the Cross Section Shade and the Type of Strain on the Damping of Vibration of Rods – V. V. Matveev and O. T. Bashta 1199 67
Mechanical Properties of Composite Materials Based on Polyfluoroethylene Resin – I. M. Fedorchenko, I. I. Beloborodov, A. V. Nenakhov, and A. F. Beloivan 1204 72
Investigation of the Influence of Heat-Resistant Coatings on the Fatigue Strength of Heat-Resistant Steel – I. I. Ishchenko, V. I. Omel'chenko, B. N. Sinaiskii, A. D. Pogrebnyak, P. S. Banas, and M. I. Reznik 1208 76
Evaluating the Strength of Composite Materials – Yu. I. Kozub and M. M. Aleksyuk 1214 82
The Interrelationship between the Microstructure and Failure Characteristics of High-Strength Steels – V. G. Laz'ko, V. E. Laz'ko, and B. M. Ovsyannikov. 1219 86
The Reliability of Metallurgical Testing in Determining the Mechanical Properties of Materials – É. N. Darchinov. 1224 91
Mechanical Porperties of High-Strength Stainless Steel of Transitional Class ÉP288 (Kh16N6, SN-2A) at Cryogenic Temperatures – Ya. V. Transtevich, L. S. Popova, Ya. M. Potak, A. M. Sukhotin, G. N. Grikurov, and N. P. Antropov. 1230 97
Summation of Static and Cyclic Effects on Strength during Thermocyclic Loading – R. A. Dul'nev 1234 101

PRODUCTION SECTION
Experimental Study of the Stressed State of Design Elements in a Large Capacity Grab – B. S. Kasatkin, L. M. Lobanov, V. F. Musiyachenko, V. A. Pivtorak, and G. T. Tkachuk 1238 105
Design of a Gas-Turbine Wheel – V. I. Tseitlin 1243 110
Concentration of Bearing Stresses Close to the Deadwood Bearing of a Ship's Drive Shaft – T. A. Zhuravleva 1250 116

BRIEF COMMUNICATIONS
Large Deflections of Nonlinearly Elastic Beams – V. S. Utkin 1253 119
Effects of Impurity Concentration and State on the Yield Point of NaCl : Ca^{2+} Crystals – G. A. Andreev and B. I. Smirnov 1257 122

Volume 3, Number 11 November, 1971

SCIENTIFIC AND TECHNICAL SECTION
The Long Time Strength and Creep of Heat Resistant Materials with a Programmed Change in Temperature – N. S. Mozharovskii and E. A. Antipov. 1261 3
Study of the Deformation Process in Low-Cycle Loading – A. N. Romanov and M. M. Gadenin 1268 10

Change in the Fracture Strength of Structural Steels under the Influence of Cyclic Stresses – V. S. Girenko, V. A. Deinega, and A. M. Khololeev 1274 16
The Question of the Conditions of Plasticity and Brittle Fracture of Metals – N. I. Volkov 1281 23
Structure and Properties of 1Kh18N9T Austenitic Steel After Program Loading – I. A. Gindin, I. M. Neklyudov, V. M. Netesov, and M. P. Starolat 1286 28
A Thermodynamic Theory of the Mechanical Strength and Failure of a Solid Body – V. V. Fedorov 1290 32
Stability of a Structure Consisting of Two Concentric Rings Connected by Radial Stays under Uniformly Distributed Load – Yu. D. Korablev 1294 35
Velocity Dependence of the Discreteness of Slip and the Hardening Parameters in Aluminum at Low Temperatures – D. A. Didenko and V. V. Pustovalov 1298 38
Change in Fatigue Limit of Some Light Alloys on Cooling from Room Temperature to –269°C – L. P. Andreev and N. V. Novikov 1305 45
Influence of Processing Technology on the Durability of Sheets of the Titanium Alloy OT4-1 – V. A. Samgin, I. A. Troyan, and V. N. Semirog-Orlik 1308 48
Dependence of the Mechanical Properties of Alloys of Titanium with Vanadium and Aluminum on the Oxygen Content – Yu. A. Maksimov, I. I. Kornilov, A. G. Voinitskii, V. E. Blashchuk, and S. D. Zagrebenyuk 1313 54
Features of the Deformation and Failure of 1Kh18N9T Steel on Thermocyclic Loading in Relation to the Time for Which the Material is Held at the Maximum Temperature – N. S. Mozharovskii 1316 56
Dependence of the Yield Stress of Metals on Grain Size – S. G. Tresvyatskii 1320 60
The Nature of Dislocation Motion in KCl Crystals – V. A. Makara, N. N. Novikov, and S. V. Mnyshenko 1324 64
Investigation of the Structure of the Material of Gas-Turbine Blades Made of ZhS6KP Alloy – G. P. Pimenova 1328 69
High-Strength Carbon Materials (Survey) – L. A. Plutalova and G. B. Skripchenko 1334 75
Creep and Recovery of Plasticized Polyvinylchloride Under Biaxial Tension – S. S. Veremchuk and É. S. Umanskii 1339 80
Evaluation of Softening of Plastics During One-Sided Heating – E. G. Kuzovkov, V. S. Dvernyakov, B. A. Lyashenko, and V. V. Pasichnyi 1344 84
The Strength of Nickel Reinforced with Tungsten Fibers – V. N. Golovin, N. D. Rybal'chenko, A. I. Somov, and A. S. Tron' 1351 91
The Compressive Strength of Copper Reinforced with Tungsten Fiber – M. L. Gorb, B. A. Marek, and O. K. Teorodovich 1355 95
Search for Lightest Rod-Type Carrier System by the Dynamic Programming Method – V. Ya. Mikhailishchev 1358 98

PRODUCTION SECTION
Differing Tendencies to Brittle Failure of Various Heats of 40Kh Steel – S. M. Baranov, G. A. Vorob'eva, and S. I. Karatushin 1362 101
Investigation of Damped Oscillations of Structural Components in Flowing Water – A. A. Kaminer and B. M. Kavitskii 1366 106
Experimental Investigation of the Stress in Circular Rings – I. P. Vlasenko and V. A. Potichenko 1369 109
The RMA-5 Automatic Tester – M. A. Merman and B. V. Titov 1373 114

BRIEF COMMUNICATIONS
A Method of Determining Fracture Toughness Using the Results of Long Time Strength Testing – V. I. Gladshtein and M. F. Sheshenev 1376 117
Young's Modulus of Molybdenum Sheet – Ya. M. Vitorskii, L. S. Igolkina, I. S. Malashenko, G. N. Nadezhdin, and V. G. Tkachenko 1378 119

Engl./Russ.

Volume 3, Number 12 December, 1971

SCIENTIFIC-TECHNICAL SECTION

Ductility and Rupture of Heat-Resistant Materials at High Temperatures under Nonstationary Loading – N. S. Mozharovskii and E. A. Antipov 1381 3

Stress and Strain in Extended LTW Glass Fiber Reinforced Plastics – V. A. Kolgadin 1387 9

Elastic Properties of Oiled Beech Wood – Yu. V. Gorbachev and V. N. Kuznetsov 1393 14

Stepped Creep-Rupture Tests – G. A. Demidov and B. E. Korsakov 1397 17

Temperature Stresses in the Pole of a Spherical Reservoir during Compressed Gas Freezing – A. I. Konovalova, B. A. Kuranov, and L. A. Lifshits 1400 19

Maximum Temperature Drops and Thermoelastic Stresses in the Symmetric Heating of Prisms and Parallelepipeds – N. Yu. Taits, A. G. Sabel'nikov, A. N. Minaev, and V. V. Moshura 1405 24

Methods for Determining Mechanical Properties and Structural Strength of Metals at Low Temperatures – V. I. Zmievskii, V. N. Egorov, L. I. Pyatyshev, E. P. Zamilatskii, and G. G. Konradi 1407 26

Determining the Influence of Residual Stresses on the Brittle Strength of Welded Casings with Surface Defects – G. P. Cherepanov, A. B. Kaplun, and L. P. Karasev... 1411 30

Determining the Conditions for the Appearance of Reversible Hydrogen Brittleness in Metals – R. M. Gabidullin, B. A. Kolachev, and P. D. Drozdov 1417 36

Some Aspects of the Heat Resistance of Refractory Materials – I. I. Nemets 1423 41

Analysis of an Approximate Calculation on the Shells of Friction Pulleys by Means of the Initial-Parameter Method – F. L. Shevchenko, L. N. Dyadyk, and Yu. L. Vetryak 1427 44

Application of the Viscoelastic Theory in Calculations of Polymer Machine Parts – A. I. Sviridenok and V. E. Starzhinskii 1433 50

Analysis of Energy Dissipation during Transverse Vibrations of Metal Specimens with Damping Coatings – G. S. Pisarenko, A. A. Shemegan, and O. E. Boginich ... 1439 55

Improvement of Steel Resistance to Brittle Fracture Through Prestrain – V. A. Deinega and V. S. Girenko 1444 60

The Influence of the Structure of Graphite on its Strength – G. M. Volkov, V. N. Barabanov, N. N. Dergunov, E. N. Zakharova, and V. I. Kalugin 1449 65

Failure Conditions of Graphites in Heat Fluxes – D. A. Trapeznikov, V. A. Ursin, D. V. Kochetov and Yu. P. Anufriev 1452 68

PRODUCTION SECTION

On the Softening of Heat-Resistant Alloys under Stress-Relaxation Conditions at High Temperatures – A. M. Borzdyka 1456 72

The Effect of Chemical Machining on the Mechanical Characteristics of the Aluminum Alloy AMg6 – L. V. Andreev and V. P. Dotsenko 1459 75

Influence of Design Factors on Amplitude–Frequency Characteristics of Axial Fan Blades – V. T. Gorlyshkin, V. Ya. Oleinik, and I. F. Mariichuk 1462 78

Damping Resonance Shock-Absorbing Systems – P. D. Vil'ner, N. S. Kondrashov, A. P. Putilova, and V. I. Suslikov 1465 81

Method for Applying a Fatigue Crack to Impact Test Specimens Made From Tough Materials – D. V. Lebedev and V. M. Ovsyannikov 1468 84

Influence of Test Temperature on Phase Composition, Mechanical Properties and Cavitation Resistance of Unstable Austenitic Steels – I. N. Bogachev, V. P. Korobeinikov, and S. B. Rozhkova 1471 88

BRIEF COMMUNICATIONS

Special Features Shown by the Forced Vibrations of a Rigid Wire Shaft – V. M. Glozman 1476 94

Engl./Russ.

Influence of Stress Concentrations on the Mechanical Properties of Molybdenum at Normal and Enhanced Temperatures – E. E. Zelenyuk and V. N. Rudenko 1479 96
The Influence of Static Stresses on the Dissipation of Energy Due to Forced Oscillations – V. V. Khil'chevskii and V. S. Martynenko 1482 99
A Solution of the Photoelastic Problem by Photometry – B. M. Barishpol'skii and G. D. Radtchenko 1485 101
